Oct23 Quiz

How Much?

Mike tried to buy some pots on the internet. If he bought 4 pots it would be cheaper. He bought 2 European and 2 British pots. Can you work out the cost for each pot and Mike's total cost.

2 Chinese + 2 Japanese = £260
2 Chinese + 2 British = £160
2 Chinese + 1 Japanese + 1 British = £210
3 Chinese + 1 British = £100
1Chinese + 2 British + 1 Japanese = £270
1Chinese + 2 British + 1 European = £180
1Chinese + 2 Japanese + 1 European = £280
